

Are You Secure From Things That Go Bump On The Net?

Internet Security Blanket Corporation (ISBlanketSM) sells security services and products. Because of our experiences with a range of products, we will help you select the best products to meet the needs of your organization.

ISBlanketSM Can Help

If you have asked or need answers to any of the following questions, we can help you!

- Are your customers Internet shy because of Internet cams and Identity Theft?
- Are you aware of your legal responsibility to protect stored and transmitted customer information?
- One of the best security strategies is layered security. Have you implemented layered security within your organization?
- Most email can be read by anyone, because it is transmitted in clear text format. Do you need secure email transmission?
- Is your organization having trouble with employees using the Internet to view inappropriate material at work?
- Did you know that poorly configured security devices are one of the leading causes of security breaches?
- Do you outsource your network security? Can you determine if you are actually secure?
- Are employees increasing your organization's risk of an unwanted intrusion by modifying their workstation configurations?
- Do your employees have a need to work remotely and access resources in the office?
